

The Childhood Bereavement Estimation Model (CBEM)¹ approximates rates of U.S. children and youth who will experience the death of a parent or sibling by the time they reach adulthood. Results from the CBEM are updated annually using national, state, and regional vital statistics.² This report **uses data from 2016 to 2020**, the most recent years of data from the Centers for Disease Control and Prevention.*

Wisconsin 2022

1 in 14

children in Wisconsin will experience the death of a parent or sibling by age 18

38TH

CBEM RANKING BY STATE[†]

7.2% ~ 91K

children will be bereaved by age 18
LOWER than national rate of 7.7%

& MORE THAN DOUBLES

223K

youth will be bereaved by age 25

↑ Why Did Rates Increase? The increase in *projected* childhood bereavement rates reflects differences in adult mortality for specific causes of death, including COVID-19. Learn more in the 2022 CBEM National Report.

Leading Causes of Death in Wisconsin²

Percentages reflect the proportion of total deaths caused by each of the leading causes for youth and adults according to the CDC.

Youth Ages 0 - 24 [‡]		Adults Ages 25 - 60 [‡]
Accidents (27.4%)	#1	Cancer (22.8%)
Conditions Related to Birth (18.2%)	#2	Accidents (18.3%)
Suicide (12.0%)	#3	Heart Disease (16.3%)
Birth Defects (9.6%)	#4	Suicide (6.6%)
Homicide (7.4%)	#5	Liver Disease (4.3%)

Death of a Sibling & Death of a Parent

The CBEM provides separate, independent estimates for youth who will experience the death of a parent or the death of a sibling.
